

SMART, POWERFUL AND MULTI-FACETED. THE **ICAISSE** IS THE ULTIMATE ACCESSORY TO ENABLE NFC. OFFERING SEVERAL DISTINCT MODELS TO MEET YOUR NEEDS.

PRODUCT OVERVIEW

DeviceFidelity's patented NFC accessory design is available through different iPhone sleeve vendors in addition to DeviceFidelity own iCaisse models. These solutions available for iPhone 5, iPhone 4S, and iPhone 4 use the DeviceFidelity microNFC 3.2 that has been certified by Visa, MasterCard, Amex and Discover and brings full NFC capabilities to iPhones supporting all modes including NFC reader/writer, card emulation and peer-to-peer.

MAIN FEATURES

- A choice of models with different cosmetics yet a single SE to manage
- Removable SE provides more options and facilitate personalization through standard EMV certified equipment
- SE accessible to iPhone Apps through standard DeviceFidelity APIs
- Customizable accessory signature for easier set up with Apple app store
- Optional on-the-go charger (specific accessory models only)
- Control of battery off mode and NFC activation
- Supported by major TSM vendors

AVAILABLE CASES

incipio Cashwrap

Combined with DeviceFidelity's microNFC solution, the incipio designed Cashwrap iPhone case enables the iPhone 5, iPhone 4s and iPhone 4 for NFC. The secure element is stored in the pluggable and transferable microSD and communicates with the iPhone enabling the iPhone for all three NFC modes including NFC reading/writing, card emulation and peer-to-peer communication.

iCaisse 4L

Combined with DeviceFidelity's microNFC solution, the powerful and multi-functional iCaisse4L allows iPhone 4S and iPhone 4 users to fully utilize NFC features such as card emulation, tag reading and writing, and peer-to-peer mode. Use the iCaisse4L with an NFC contactless terminal, sticker or another NFC enabled phone.

iCaisse 4X

Similar to the iCaisse 4L the ICaisse 4X enables the iPhone4S and iPhone 4 for full NFC through DeviceFidelity's microNFC solution. Plus, the iPhone case also features an on-the-go charger providing several more hours of use before plugging in for charging.
